

About the Fund

The primary investment objective of the Beacon Selective Risk ETF (BSR) is to seek to provide long-term capital appreciation. The fund is actively managed and aims to provide upside exposure to the U.S. equity markets, while, at the same time, offering downside risk management. The fund looks to meet this objective by investing in exchange-traded funds (ETFs) of U.S. equity sectors that are trending positive and reallocating to fixed-income ETFs when that sector's performance is negative.

Investment Thesis

- Avoiding losses is key to strong, long-term investment performance.
- While the overall equity market may move in one direction, the performance of any individual sector may vary.
- Allocating to sectors that are expected to experience positive performance while avoiding those expected to decline and investing in fixed-income ETFs in their place may provide investors with equity market exposure with downside risk management.
- A disciplined strategy may help investors avoid irrational decisions based on fear or greed.

Investment Process

- Under normal market conditions, the Fund will invest in an equal-weighted basket of low-cost, U.S. equity sector exchange-traded funds (ETFs).
- When individual sectors hit predetermined negative performance targets, the fund liquidates its position in its ETF and reinvests the proceeds in fixed-income ETFs.
- When the divested sector hits predetermined positive performance targets, the fund liquidates its corresponding position in fixed-income ETFs and reinvests the proceeds in its sector ETF.

Where BSR May Fit in Your Portfolio

- Equity Exposure – BSR may be used as a portion of your portfolio's U.S. equity allocation.
- Defensive Equity Exposure – BSR may be appropriate for investors seeking risk reduction or mitigation.
- Factor Exposure – BSR may be appropriate for investors seeking low volatility equity exposure.

Beacon Capital Management, Inc.

Beacon Capital Management is a next-generation registered investment advisory firm that provides investment advisors and institutions with innovative portfolio solutions designed to meet the investment growth and risk management needs of today's investors. Beacon designs and manages investment portfolios based on research from Nobel Prize-winning scholars, mathematical formulas, and mechanical execution strategies. Each portfolio model offers proprietary risk management solutions and aims to deliver consistent returns for the mid- to long-term investor.

Carefully consider the investment objectives, risks, charges, and expenses. This and other important information can be found in each of the Beacon ETF prospectuses, which should be read carefully before investing and can be obtained [here](#) or by calling 866.439.9093.

Risk Disclosures

The Adviser has not previously managed a mutual fund or an ETF. The Selective Risk Fund is a new ETF with a limited history of operations for investors to evaluate. All investing involves risk, and asset allocation and diversification do not guarantee a profit or protection against a loss. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, might be worth more or less than their original cost. ETFs are subject to risks similar to those of stocks, as well as other risks specific to the particular ETF.

ETF shares are traded on exchanges and are traded and priced throughout the trading day. ETFs permit an investor to purchase a selling interest in a portfolio of stocks throughout the trading day. Because ETFs trade on an exchange, ETF shares are bought and sold at market price (not NAV). The prices of ETFs may sometimes vary significantly from the NAVs of a ETFs' underlying securities. Brokerage commissions will reduce returns.

The Beacon ETFs are distributed by Northern Lights Distributors, LLC, member [FINRA/SIPC](#). Beacon Capital Management & Sammons® Financial Group, Inc. are independent of and not affiliated Northern Lights Distributors, LLC.
